Subject: RE: Propane Bids

Good morning,
I spoke with a representative of both parties this morning:

Combined Energy Services- Cost of Propane per gallon- CES Wholesale Plus \$.6933

He stated that we pay a little over their wholesale price – This price would change day to day – For example today's price would be \$1.5987 (In January we paid \$1.91 and Dec 2022 we paid \$1.70) so the rates fluctuate. He stated the Bid submitted is the same they have done every other year.

Penn Oak Services- Cost of propane per Gallon - \$3.34 – He stated this is the final price after they factored in everything; cost of transport (they are out of Pennsylvania) supplies ect. He also wanted to mention their business is a SDVOSB business:

Service-Disabled Veteran-Owned Small Business

The Department of Defense (DoD) has undertaken an outreach effort to identify small businesses owned and controlled by veterans and service-disabled veterans. The DoD outreach effort aims to improve prime and subcontracting opportunities for veteran and service-disabled veteran-owned small businesses. The DoD believes that the sacrifices made by veterans in the service of our country needs to be recognized at all levels of government. The Defense Department is committed to make the maximum practicable prime and subcontracting opportunities available to such firms.

If you need further clarification on anything, please let me know so I can reach out again.

Have a good weekend.

Nicole Young
Deputy Town Clerk Woodbury
845-928-6829 Ext 1223
